tts**CONSOLIDATOR**™
FEATURES

GENERAL | Web-based Solution

ALL TRAVELPORT GDS	Supports full integration with Apollo, Galileo and Worldspan GDS.
GRAPHICAL INTUITIVE WEB EXPERIENCE	Intuitive web experience for both GDS expert and GDS non-experienced travel agents, it works with all mainstream web browsers allowing travel agents to work how and when suits them best. It doesn't require any software installation.
SMARTPOINT PLUGIN NEW	TTS Consolidator Smartpoint Plugin allows sub-agents to access features of TTS Consolidator directly in Travelport Smartpoint like issuing tickets, increasing sub-agents productivity and comfort. Go to TTS Consolidator Smartpoint Plugin section to learn what features are supported by the plugin.
CUSTOM URL	Each consolidator may define his own url to access TTS Consolidator 3.0.
CURRENCY FLEXIBILITY	Supports the currencies supported by the GDS and the currency can be customized per consolidator. The system also supports double currency logic (custom currency and Dollars).
MULTI-LANGUAGE	Supports English, Portuguese and Spanish (being prepared to accommodate other languages) and the language is automatically selected based on the user's browser preferred language.
LOGIN CREDENTIALS	Login credentials are composed by username and password, which allows users to have the same email associated to their profiles and lets users to be logged in the GDS environment and in TTS Consolidator at the same time.

FLIGHT SEARCH | Powerful Search Engine

BEST PRICE SEARCH	Best Price search is based on Best Buy, which allows users to better serve the clients that give priority to price.
ADDITIONAL BEST PRICE SEARCH METHODS	Ability to improve the results for best price search through Flexi Flights (One Way combinations) and Cross Ticketing.

AVAILABILITY SEARCH	Search method based on availability allowing users to better serve the clients that give priority to flight schedule.
BOOK SEVERAL FARE QUOTES SIMULTANEOUSLY	Availability search allows multiple fare quotes in the same screen and supports booking storing several fare quotes simultaneously, with just one click.
SEARCH AS A SUB-AGENT	Allows consolidators to search flights as one of their sub-agents to access exactly what their sub-agencies see.
COVERS SEVERAL JOURNEY TYPES	Users can search One Way, Round Trip and Multi-destination trips.
COVERS SEVERAL PTCS	By default, users can search and book for adults (ADT), children (CNN), infants (INF) and infants with seat (INS) however specific PTCs can be configured per consolidator.
ADVANCED SEARCH PARAMETERS	Users have additional parameters to refine search: Cabin, Carrier, Flight Number and Direct Flights. For consolidators with two currencies, users can select the currency in which prices will be displayed in the search results.
FLIGHT DETAILS	Users can access flight details per flight: Flight Number, Carrier, Duration, Distance, Class, Fare Basis, Seats, Ticketing Deadline and Fare Rules.
CHECKED BAGGAGE VISUAL INFO	Immediate visual and detailed access to the checked baggage allowed during all the booking process.
PRIVATE FARES VISUAL INFO	Immediate visual info if the price is based on a private fare.
EXTENSIVE FILTERS	Results can be filtered by Price, Departure time, Marketing Carrier, Plating Carrier and number of Stops.

PNR | Easy Booking Process

CREATE, EDIT, CANCEL PNRS	A simple interface allows users to create a PNR in a second without having to know any GDS commands. Users can also easily edit and cancel PNRs and import PNRs created in the GDS environment.
IMPORT PNRS FROM THE GDS	Users can import PNRs from the GDS to be ticketed in TTS Consolidator. TTS Consolidator and GDS are not exclusive, agents can continue to work in the GDS and use TTS Consolidator just to issue tickets.
CRYPTIC PNR VIEW	Supports access to the PNR cryptic script.
ADD AND REMOVE PNR SEGMENTS	Before the PNR has been Ticketed, agents can add and remove PNR segments.

FILED FARES	Supports several filed fares and displays full filed fare details, allowing also users to change the Ticket Fee at booking time.
APIS	Supports Advanced Passenger Information System data (Name, Surname, Middle Name, Gender, Date of Birth, Nationality, Travel Document Type, Travel Document Number, Travel Document Expiration Date and Travel Document Country of Issue).
FREQUENT FLYER CARD	Supports Frequent Flyer card information insertion and adds it to the booking.
SSRs	Supports GDS SSR requests and adds them to the GDS booking.
SEATING	Supports pre-seating at booking time.
NAME REMARKS	Supports Name Remarks.
REMARKS	Displays the visible remarks set by the consolidator and sub-agencies at remarks management area so that the user can fill-in the correspondent information to be inserted in the PNR.
VENDOR REMARKS	Displays the PNR vendor remarks.
ITINERARIES	Integration with View Trip and itinerary generation. Itineraries can be downloaded or sent by email, to one or multiple email addresses, in PDF format.
HIDE PRICES IN VIEWTRIP	Consolidators may allow their sub-agencies to decide if they want to hide prices in ViewTrip. This feature can be enabled for specific sub-agencies only.
PNR SEARCH	PNR search area allows user to search PNR by PNR code and Name.
QUEUES	Displays all not empty Queues and allows its management.
STICKY PNR SEARCH	Always present area throughout the application even if the user scrolls down. It allows the user to search for a PNR no matter where he is in the application or shows the user if and what PNR is open while allowing immediate access to its available actions.

TICKETING | Risk Free Ticketing Autonomy

ONE-CLICK TICKETING	Non-IATA users can issue tickets with just one click and the tickets are immediately generated.

PAYMENT WITH APPROVED CREDIT OR CREDIT CARD	Non-IATA users can pay tickets using the available credit or credit cards depending on what was authorized by the consolidator for that sub-agency.
GUARANTEED FARES ISSUANCE	The ticketing system only issues guaranteed fares, eliminating the risk of fare manipulation that can lead to unwanted ADMs.
ENDORSEMENTS	Allows you to add endorsements to the tickets.

SETTINGS | Strong Flexibility

FLEXIBLE SETTINGS	Consolidators may define general IATA Fees, preferred carriers, blacklisted carriers and remarks or customize specific settings per sub-agency, offering full setup flexibility.
FEES	Supports IATA Fees, XP and Ticket Fees. All fees can be set by "Flight Type" (National, International and Intercontinental), "Journey type" (One Way, Round Trip and Multi-destination) and "Up to" (fare range) which will allow the user to make the fee depend on the fare amount. Fees can be set as an absolute value and/or a percentage of the fare amount.
PREFERRED CARRIERS	This section allows consolidators and sub-agencies to add the carriers they wish to point out to their users as being their preferred ones. Excel file import and export is available.
BLACKLISTED CARRIERS	This section allows consolidators and sub-agencies to specify the carriers they wish to exclude from the search results. Excel file import and export is available.
REMARKS MANAGEMENT	This section allows consolidators and sub-agencies to specify the remarks that will be added to the PNR. The remarks can be set to be directly added to the PNR without the need for the user to fill-in anything or make them visible during the PNR creation to be filled-in.
PREFERRED QUEUES MANAGEMENT	This section allows consolidators and sub-agencies to specify the 6 preferred queues they wish to be displayed in the Preferred Queues section available in the homepage.
SUB-AGENCY LOGO SUPPORTED NEW	Sub-agencies can upload their own logo and display it on their itineraries.
CUSTOMIZABLE VOID PERMISSIONS NEW	IATA agencies can define if their sub-agents can void tickets.

MANAGEMENT | Full Account Tracking

MANAGE MY SUB-AGENCY	Allows each agency to manage their own editable information.

MANAGE SUB-AGENCIES	Allows consolidators to manage their sub-agencies editable information.
CREDIT CARDS MANAGEMENT	Consolidators can set their credit card acceptance logic per sub-agency: not accepted, accepted or specify the credit cards that will be authorized.
CREDIT MANAGEMENT	Allows sub-agencies to request credit to their consolidator as Credit Request or Money Transfer and attach files. Consolidators will then be able to accept, accept changing the amount or deny the request.
AGENCIES BALANCE	Allows consolidators to see all their sub-agencies balance and notify those he wishes to alert about low balance.
ACCOUNT TRANSACTIONS	Allows sub-agencies to check all their transactions and allows consolidators to keep track of all their sub-agencies transactions providing filtering per sub-agency for easier tracking.
AIRLINE COMMISSIONING	Allows consolidators to manually input airline commissions by city-pair or country-pair.
REPORTING	Reports are exported to excel files. Supports ticketing reports (per PNR, Ticket or Segment) and account reports.
PRIVATE FARES	Consolidators can specify private fares for all sub-agencies or per sub-agency. Private fares cloning is available to speed up the process of creating new private fares. Supports Cat35, Account Code, Tour Code and Published private fares and users can set private fares for both One Way and Round Trip journey types and add OSI per private fare. Private fares can be exported to an Excel file.
IATA BOARD MANAGEMENT	Area where the consolidators can manage the information that appears on the IATA Board displayed in the homepage.

INSIGHT | Content Highlight

NOTIFICATIONS SECTION	Always present notifications block keeps the user updated with indicators about his business most critical information and useful content.
MONTHLY SALES DASHBOARD	Summarises the sales of the current month right on the homepage offering consolidators a quick insight about their sub-agencies sales activity and Non-IATA agencies the ability to see their own performance.
NEWS	Displays TTS news and curated travel industry information published on the TTS blog.
PREFERRED QUEUES	Preferred queues homepage block displays the 6 most relevant queues for your agency.

IATA BOARD	Area where consolidators can post information to all their sub-agencies like business procedures or communications.
IN-APP ALERTS	Area reserved to disclose application alerts to users.

SMARTPOINT PLUGIN | More productivity and work comfort NEW

SUPPORTED FEATURES	The TTS Consolidator Smartpoint Plugin is available for sub-agency users and offers the following features directly in Travelport Smartpoint: - The login in the plugin is made using TTS Consolidator credentials - Issue PNRs according with the business rules established in TTS Consolidator - Check available credit - Check transactions
